

Scrutiny Café – question 1,2,3

1. Identifying health needs

Given the concerns raised today - what more can health commissioners and providers do to better understand the needs of rural communities?

2. Delivering outcomes

If the needs of rural communities are recognised and understood - what more could or should be done to meet those needs and improve the health and wellbeing of people in rural East Sussex?

3. Quality versus equality

Given the limited resources available – how can health services be improved for all whilst also reducing health inequalities for those in rural areas?
